Sites
1=Golden Valley Memorial Healthcare (GVMH)
2=Children's Mercy Hospital (CMH)
3= St. Luke's Hospital - Plaza
4= Compass Health Network
5= Western Missouri Medical Center (WMMC)

Sites 2 and 3 are both more than one hour of travel time each way from the primary site; program provides appropriate housing during these rotation to reduce the burden associated with excessive travel.

Electives
Elective rotations are a core component of the Golden Valley Memorial Healthcare Family Medicine Residency and allow residents to individualize their training based on career goals, community needs, and educational interests. Rotations may include advanced training in core family medicine areas or approved subspecialty experiences, including but not limited to: Urology, Ophthalmology, Neurology, Palliative/Hospice Care, Medical Informatics, Laboratory Medicine/Pathology, Rheumatology, Risk Management and Medical Liability, Wound Care, Endoscopy, Neonatology, Osteopathic Manipulative Medicine (OMM), and Radiology. Additional elective experiences may be developed based on resident interest and educational value. Site and site director can vary. The number of months each year do not equal 12 because residents have a total of seven months of elective time. PGY-1 residents have one month of elective. PGY-2 residents have two months of electives. PGY-3 residents have four months of electives. Elective rotations outside the primary training site may be permitted with Program Director approval for up to two months during PGY-3.

Continuity Clinic: FMP Half Days		
PGY 1	PGY 2	PGY 3
1	2	3
Except when on Pediatric Inpatient rotation at Site 2.	Except when on Critical Care rotation at Site 3.	Except when on Pediatric Emergency Medicine rotation at Site 2.

Longitudinal Experience: Long-Term Care
Geriatrics experience in long-term care begins in PGY-1. Residents are assigned a patient panel at Clinton Healthcare & Rehab, a skilled nursing facility located approximately 2.3 miles from the primary site. They attend one half-day per month for 11 months each year throughout residency. This longitudinal experience provides at least 24 months of continuity care, including a minimum of 100 hours (or one month) dedicated to older adult care and at least 125 patient encounters. Due to its distributed structure, this experience is not reported as a full block rotation.
